THE BREWER COMPANY™

# Alleviate™

The EG-9000 Series dental stool featuring the Alleviate™ Support System is designed to relieve and reduce the occurrence of musculoskeletal pain and localized fatigue caused by prolonged force, repetition, and awkward postures.

**Statistics show that as many as 300,000 musculoskeletal injuries could be prevented each year.\***

Daily procedures put dental professionals at high risk for musculoskeletal injuries due to the working positions they must maintain. Musculoskeletal injuries can result in lost work time, inability to enjoy normal activities, and premature retirement.

The Brewer Company, in conjunction with Marquette University, analyzed actual working conditions in the dental operator. Through extensive electrode testing and observation, we pinpointed the seating mechanics needed to accommodate the strenuous demands of your workday.

The Alleviate™ Support System, combined with the EG-9000 Stool, provides the most advanced support of the back, neck, and shoulder muscles, resulting in a more productive, pain-free work environment.

\* All the Right Moves, Dental Economics, by Risa Pollack-Simon, CMC

The #9020BR/L Assistant Stool has the same features as the #9000B shown above, plus an additional footring and body support.

Available in over 100 upholstery colors to match any patient chair or operatory décor.

**Contoured Backrest With Lumbar Support** easily adjusts to cradle and support the lumbar region.

**Gel Elbow Rests** provide comfort and support while absorbing vibration from instruments.

**Height Adjustable**

**Shallow Seat Pan** helps keep you positioned against the backrest while maintaining proper pelvic tilt.

**Contoured Seat with Waterfall Edges** eliminates pinching and circulation cut-off of the thighs and knees.

**Patented Ball and Socket** tension can be adjusted for individual preference. Allows for free and natural movement.

**Cut-Out Seat** properly distributes weight to take pressure off the lower back and thigh region.

**Synchronized Tilt** of the seat and backrest promotes proper curvature of the spine.
