

STOOL ASSEMBLY INSTRUCTIONS

1. Remove the base from the carton and place on the floor upright.
2. Remove the cylinder from the packaging.
3. If a footring is included, slide the bottom of the cylinder through the footring.
4. Place the large end of the cylinder, with attached footring into the center holes of the base.
5. If a swing arm is included, place the swing arm over the top end of the cylinder until it comes in contact with the collar. Insert the body support ratchet into the swing arm and tighten knob.
6. Place the open hole in the control plate over the top end of the cylinder.
7. Apply pressure to the top of the seat to lock the base, cylinder and seat together.
8. If a backrest is included, remove the hand knob and washers (if used) from the bottom of the control plate. Slide the slotted end of the backrest bar into the rectangular end slot. Reassemble the hand knob and washers (if used) through the slot in the bar in the same order as removed.
